On April 5, 2000, the Board held a public hearing on the application. The board heard testimony from Mr. Laurent Lafleur, the proposed builder of the project. Granting such variances requires a showing through substantial evidence of a practical difficulty upon the owner arising out of some unique or exceptional condition of the property such as exceptional narrowness, shallowness, shape or topographical conditions. Further, the Board must find that the application will not be of substantial detriment to the public good and will not substantially impair the intent, purpose and integrity of the Zoning Regulations and Map.

The Board concludes that the applicant has not met the burden of proof pursuant to Subsections 404.4 and 404.1.

The Board concludes that a practical difficulty does not exist at the site; that this proposal would impair the intent, purpose and integrity of the Zoning Regulations and Map; and that it would cause adverse impacts on the neighborhood. Accordingly, it is hereby **ORDERED** that the application be **DENIED**.
