CHAPTER 1  INTRODUCTION TO RESIDENTIAL FLAT (RF) ZONES

100  GENERAL PROVISIONS

100.1 The Residential Flat (RF) zones are residential zones, which provide for areas developed primarily with row dwellings, but within which there have been limited conversions of dwellings or other buildings into more than two (2) dwelling units.

100.2 The RF zones are designed to be mapped in areas identified as low-, moderate- or medium-density residential areas suitable for residential life and supporting uses.

100.3 In addition to the purpose statements of individual chapters, the provisions of the RF zones are intended to:

   (a) Recognize and reinforce the importance of neighborhood character, walkable neighborhoods, housing affordability, aging in place, preservation of housing stock, improvements to the overall environment, and low- and moderate-density housing to the overall housing mix and health of the city;

   (b) Allow for limited compatible non-residential uses;

   (c) Allow for the matter-of-right development of existing lots of record;

   (d) Establish minimum lot area and dimensions for the subdivision and creation of new lots of record in RF zones;

   (e) Allow for the limited conversion of rowhouse and other structures for flats; and

   (f) Prohibit the conversion of flats and row houses for apartment buildings as anticipated in the RA zone.

100.4 The RF zones shall be distinguished by a maximum number of principal dwelling units per lot of either two (2), three (3), or four (4) units.

100.5 For those zones with geographic identification, the boundaries are cited in Subtitle W and identified on the official Zoning Map. When there is a conflict between the official Zoning Map and the boundaries described in Subtitle W, the Office of Zoning shall determine the correct boundaries through a zoning certification.

101  DEVELOPMENT STANDARDS

101.1 The bulk of structures in the RF zones shall be controlled through the combined general development standards of this subtitle, the zone-specific development standards of this subtitle, and the requirements and standards of Subtitle C.
101.2 The development standards are intended to:

(a) Control the bulk or volume of structures, including height, floor area ratio, and lot occupancy;

(b) Control the location of building bulk in relation to adjacent lots and streets, by regulating rear setbacks, side setbacks, and the relationship of buildings to street lot lines;

(c) Regulate the mixture of uses; and

(d) Promote the environmental performance of development.

101.3 Development standards may be varied or waived by the Board of Zoning Adjustment as a variance or, when permitted in this title, as a special exception. Additional zone-specific special exception criterion, if applicable, shall be considered by the Board and are referenced in this subtitle.

101.4 In addition to the development standards set forth in this subtitle, additional general regulations relevant to this Subtitle can be found in Subtitle C.
